SUMMARY

Software Engineer with 4 years of experience building iOS/Android apps in React Native, skilled in REST APIs, state management, CI/CD, and cloud, delivering scalable, user-centered solutions in Agile teams.

WORK EXPERIENCE

Software Developer | Lime Software Logics | Apr 2023 to Sep 2024 | Karachi, Pakistan

- Shipped core features for a US pavement-industry app: team chat, zone/project status, PDF export, maps, notifications, and subscription access.
- Implemented real-time chat and push notifications with Firebase RTDB; supported UAT and resolved production issues.
- Worked in Agile sprints and contributed to on-time releases that helped the client take the product to market.

Mobile Application Developer | SAS Solutions ORG | Jul 2021 to Apr 2023 | Karachi, Pakistan

- Delivered new and maintenance features across food delivery, identity verification, recruitment, and home-inspection apps.
- Implemented basket/checkout (PayPal, Stripe) and custom deals; ensured stable releases through testing and Git workflows.
- Used RN architectures (CLI/Expo), Context/Redux-Thunk/Saga; wrote clean code and reviewed PRs.

EDUCATION

- MSc Computer Science | Nottingham Trent University | Oct 2024 to Sep 2025
- BS Software Engineering | Iqra University | Sep 2015 to May 2019

MAJOR PROJECTS

Pavement App (Android | IOS)

- Connects contractors and property managers using satellite imagery and geo-tagged media to scope on-site repairs.

Identity Verification App (Android | IOS)

- An app designed for individuals or businesses that need to verify the identity of those they interact with, including domestic employees, tenants, agents, business partners, or anyone in a trusted position.

Food Ordering App (Android)

- For a Germany-based restaurant; menus, deals, baskets, and payments.

SKILLS

- Core Skills: JavaScript, TypeScript, Kotlin, Java
- Frameworks and Libraries: React Native CLI, Expo, Redux Thunk, Saga, Recoil, Context API
- Cloud: Microsoft Azure (Functions, App Services, Kubernetes), Docker
- Version Control & CI/CD: GitHub, Bitbucket, GitLab, Jenkins
- Databases: Firebase (RTDB and Firestore), MongoDB, MySQL, SQLite
- Tools and IDEs: Postman, Clickup, Monday.com, Android Studio, Visual Studio Code, Xcode

CERTIFICATIONS

Microsoft Certified Azure Fundamentals   Sep-2025
