PROFESSIONAL SUMMARY

Software Engineer with **5+ years of experience** building robust, commercial-grade Android applications using Kotlin and Jetpack Compose across eCommerce, identity verification, financial services, and consumer platforms. Experienced in establishing architectural foundations, designing adaptive phone and tablet interfaces, and delivering rich, inclusive, accessible user experiences. Skilled in MVI, Clean Architecture, RESTful API integration, and automated Unit and UI testing. Proven track record in agile Scrum delivery, code reviews, and CI/CD using Git and Azure DevOps. Passionate about optimising application performance, resolving complex technical issues, and collaborating with Product Owners and UX to ship high-impact mobile features.

TECHNICAL SKILLS

Frameworks & Libraries:	Gradle, Retrofit, OkHttp, Ktor, Flow, RxJava, Dagger, Glide, Picasso
Practices:	Agile/Scrum, Code Reviews, Play Store Release Workflow, Production Support, Performance Optimisation, A/B Testing
Core Skills:	Kotlin, Jetpack Compose, Java, Android SDK, RESTful APIs, Adaptive UI Design, Phone and Tablet Interfaces
Cloud & DevOps:	Azure DevOps, Git, GitHub Actions, Jenkins, Docker, Kubernetes, Microsoft Azure
Databases:	Firebase Firestore, Firebase RTDB, Room, SQLite, MongoDB, MySQL
Architecture:	MVI, MVVM, Clean Architecture, Unidirectional Data Flow, SavedState
Android Development:	Jetpack Compose, Coroutines, Koin, Material Design Principles, Native Android Development, Android Studio, White-label App Development
Version Control & CI/CD:	Git, GitHub, Bitbucket, Azure DevOps, GitHub Actions, Jenkins
Tools & IDEs:	Android Studio, Xcode, VS Code, Postman, Jira, Sentry, Firebase Crashlytics
Testing:	Unit Testing, UI Testing, JUnit, Mockito, Espresso, Compose UI Test

PROFESSIONAL EXPERIENCE

Android Developer Oct 2025 – Present

Kewordal

- Led development of a native Android e-learning application using Kotlin, Jetpack Compose, and Android SDK, establishing architectural foundations and driving technical decisions for performant, scalable delivery.
- Implemented MVI with Clean Architecture, ensuring predictable state management, maintainable code, and a solid foundation for new feature development.
- Designed adaptive phone and tablet interfaces with Jetpack Compose, ensuring intuitive layouts that scale across screen sizes and provide an inclusive experience.
- Integrated RESTful APIs and third-party services to deliver rich learning functionality and seamless backend communication.
- Optimised application performance by identifying and resolving bottlenecks, reducing loading times and improving responsiveness.
- Automated builds, unit testing, and deployment using GitHub Actions, Gradle, and Fastlane, streamlining CI/CD workflows and release efficiency.

Senior Android Developer

Apr 2023 – Sep 2024

Lime Software Logics

- Developed and maintained scalable Android applications using Kotlin, Jetpack Compose, and Android SDK, delivering responsive, reusable UI components across phone and tablet form factors.
- Implemented MVI architecture, Kotlin Coroutines, and unidirectional data flow to improve application scalability, performance, and maintainability.
- Integrated RESTful APIs, Firebase Realtime Database, and Cloud Firestore to enable seamless data synchronisation and real-time functionality.
- Conducted code reviews and provided constructive feedback to ensure code quality and adherence to best practices across the team.
- Developed automated Unit and UI tests using JUnit, Mockito, and Espresso, enhancing application reliability and stability.
- Automated Android builds, testing, and deployment using GitHub Actions, Bitrise, Gradle, and Fastlane, improving release efficiency.

Android Developer

Aug 2019 – Apr 2023

SAS Solutions ORG

- Developed and maintained native Android applications using Kotlin, Java, Android SDK, and XML, delivering solutions across identity verification, food delivery, grocery, and microfinance banking.
- Implemented MVVM and MVI architectures to ensure maintainable code, structured UI state management, and scalable application development.
- Integrated RESTful and SOAP APIs for secure backend communication, data retrieval, and seamless application functionality.
- Built responsive Android interfaces using XML layouts, optimising performance, usability, and accessibility across device sizes.
- Integrated Stripe and PayPal payment gateways to enable secure payment processing and in-app transactions.
- Collaborated within agile Scrum teams, participating in sprint planning, code reviews, and iterative delivery of production features.

EDUCATION

MSc Computer Science

Sep 2024 – Oct 2025

Nottingham Trent University, United Kingdom

BS Software Engineering Sep 2015 – May 2019

Iqra University, Karachi, Pakistan

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) | Issued: Sep 2025 | Credential ID: wMoar-Fa44

KEY PROJECTS

Pavement App: Android mobile app for contractors and property managers with maps, geo-tagged media uploads, Firebase real-time chat, push notifications, PDF export, subscriptions, and project status tracking.

Identity Verification App: Mobile identity verification application enabling individuals and businesses to verify trusted roles such as domestic employees, tenants, and agents through secure digital workflows and audit-ready records.

Food Ordering App: Germany-based restaurant ordering application with menus, deals, basket management, PayPal and Stripe payments, and order tracking for mobile users.

Microfinance Banking App: Mobile application developed using Java and Android SDK for microfinance services, featuring customer registration, identity verification (KYC), loan applications, loan repayment tracking, transaction history, REST API integration, and secure account management.
