PROFESSIONAL SUMMARY

React Native Developer with **over 5 years of experience** building scalable cross-platform mobile applications. Proficient in React Native (CLI/Expo), JavaScript/TypeScript, state management (Redux, Recoil), REST APIs, and mobile CI/CD. Passionate about delivering high-quality, performant user experiences through clean code, automated testing, and Agile collaboration.

EDUCATION

MSc Computer Science Sep 2024 – Oct 2025
Nottingham Trent University, United Kingdom

BS Software Engineering Sep 2015 – May 2019
Iqra University, Karachi, Pakistan

PROFESSIONAL EXPERIENCE

Software Engineer (Contract) Oct 2025 – Present
Kewordal

- Developing an e-learning platform using React Native (Expo), focusing on scalable architecture and seamless user experiences.
- Collaborating closely with design and product teams to implement UI/UX improvements and refine feature specifications.
- Writing clean, maintainable code with unit and integration testing to ensure high-quality deliverables.
- Participating in Agile ceremonies to deliver features rapidly and demonstrate progress to stakeholders.

Senior Software Engineer Apr 2023 – Sep 2024
Lime Software Logics

- Led development of a US-based pavement industry app using React Native, shipping core features like chat, maps, PDF export, and notifications.
- Implemented real-time features with Firebase RTDB/Cloud Messaging, improving user engagement and supporting UAT/production fixes.
- Optimised app performance and reliability across iOS/Android, reducing crash rates by 15% through code refactoring and testing.
- Collaborated with backend engineers to design REST API contracts, ensuring seamless integration and data consistency.
- Delivered sprint goals on time in Agile squads, enabling the client to launch the product and grow their user base by 20%.

Software Engineer Aug 2019 – Apr 2023
SAS Solutions ORG

- Built and maintained cross-platform mobile applications using React Native and ReactJS for industries like food delivery, identity verification, and finance.
- Architected applications using patterns like MVVM and Redux, ensuring clean, testable code and scalable state management.
- Integrated REST APIs and payment gateways (PayPal, Stripe), improving transaction success rates by 10%.
- Conducted code reviews and contributed to CI/CD pipelines, enhancing code quality and reducing deployment times.
- Collaborated with designers and backend teams to refine UX and API integrations, delivering user-centric features end-to-end.

TECHNICAL SKILLS

Practices:	Agile/Scrum, Unit/Integration testing, App Store & Play Store release workflows, Jest, JUnit
Cloud & DevOps:	Docker
Databases:	Firebase (RTDB, Firestore), MongoDB, MySQL, SQLite
Frameworks & Libraries:	React Native (CLI/Expo), ReactJS, Redux Thunk, Redux Saga, Recoil, Context API
Version Control & CI/CD:	GitHub, Bitbucket, GitHub Actions, Jenkins
Tools & IDEs:	Android Studio, Xcode, VS Code, Postman, Jira, Sentry
Core:	JavaScript, TypeScript, Kotlin, Java

KEY PROJECTS

Pavement App: Cross-platform app for contractors and property managers with chat, maps, PDF export, and notifications using React Native and Firebase.

Identity Verification App: Secure identity verification app with workflows and auditability, built with React Native and REST APIs.

Food Ordering App: Restaurant app with menus, basket, payments (PayPal/Stripe), and order tracking, developed using React Native.
